

Debian Long Term Support Contract by Freexian

Traditionally, Debian manages security support of a given stable release until the next stable release plus one year. Roughly, this amounts to **3 years which is not enough for many organizations** and does not allow to deploy version N+2 once N is no longer supported. **We want to fix this by extending the security support of Debian releases to at least 5 years.**

To achieve this goal, we **need your help to fund the equivalent of a full time position** that will in fact be split over multiple Debian contributors who are established as independent workers. Did you ever wonder how you can give back to Debian? This is the perfect **opportunity to contribute to the perennial success of Debian**, an important building block of your IT infrastructure.

If you are not convinced yet, here are 7 reasons why you should subscribe to this offer:

1. The packages that you rely on get priority security support
2. Submit your own test cases and let us ensure that our security updates won't break your production infrastructure
3. Ensure that Debian 8 and 9 will also benefit from Long Term Support. Even if you don't use Debian 7 currently, Debian 8 and 9 will not have LTS status if Debian 7 LTS did not work out.
4. Direct contact with the LTS staff for your queries and requests
5. Influence the work of sponsored developers so that Debian continues to fit your needs
6. Generate goodwill among the free software community thanks to your appearance in the list of sponsors.
7. Benefit from the experience of other Debian-using companies thanks to a private mailing list.
